

organs are kept
safe by our
skeleton.

BRAIN

Our brain
is important
because it helps
us move, see
hear and speak.

LUNGS

When we
breathe our
lungs take
in air
which
contains
oxygen.
This makes
around our
body in
our blood
giving
us energy.

HEART

It pumps
blood around
our body.

STOMACH

It stores
our food
and helps
to digest
it.

TYRANNOSAURUS REX

TYRANNOSAURUS REX LIVED.....

on land over 200 million years ago!

FACTS

- ① They were very fast runners!
- ② It had two short arms with sharp claws!
- ③ It can stand up on its back feet.
- ④ The bite of a Rex was three times stronger than the bite of a great white shark.

DIET

T Rex's were carnivores and that meant they ate meat. They had sharp teeth to help them eat their meat.

DID YOU KNOW?

Dinosaurs became extinct over 65 million years ago.
